

MMAE SEMINAR

**WEDNESDAY, SEPTEMBER 1, 2004
E-1 BUILDING – CRAWFORD AUDITORIUM
3:30 – 4:30 PM**

Recent Aspects of Turbulence Research

Dr. T. B. Nickels
Lecturer In Experimental Fluid Mechanics
Engineering Department
University of Cambridge

This talk gives a brief overview of some of the new initiatives in turbulence research underway in the Engineering Department at Cambridge. The idea is to give a summary of the speakers areas of interest and motivations. Much of the work is of a fundamental nature in that it seeks to provide a better understanding of the underlying physics of turbulent flows. The main approach to the problems is the use of careful experimentation guided by physical insight and theoretical predictions.
