

- 1. Properties of Pure Substances**
 - 1.1. p-v-T Surfaces*
 - 1.2. Projections of p-v-T Surfaces*
- 2. Conservation of Energy - The First Law**
 - 2.1. Energy Balance for Closed Systems*
 - 2.2. Energy Balance for Cycles*
 - 2.3. Energy Balance for Control Volumes*
- 3. Second Law of Thermodynamics**
 - 3.1. Second Law of Thermodynamics*
 - 3.2. Reversible and Irreversible Processes*
 - 3.3. Implications for Cycles*
- 4. Entropy**
 - 4.1. Inequality of Clausius*
 - 4.2. Entropy Balance for Closed Systems*
 - 4.3. Entropy Balance for Control Volumes*
 - 4.4. The Carnot Cycle*
- 5. Availability**
 - 5.1. Introduction*
 - 5.2. Availability of a Closed System*
 - 5.3. Availability Balance for Closed Systems*
 - 5.4. Availability Rate Balance for Control Volumes*
 - 5.5. Second Law Efficiency*

6. Vapor Power Cycles

6.1. *Introduction*

6.2. *Ideal Rankine Cycle*

6.3. *Vapor Power Cycles - General Considerations*

6.4. *Modifications to the Rankine Cycle (Superheat, Reheat and Regeneration)*

7. Vapor Refrigeration and Heat Pump Cycles

7.1. *Carnot Vapor Refrigeration and Heat Pump Cycle*

7.2. *Vapor-Compression Refrigeration and Heat Pump Cycles*

7.3. *Modifications to Vapor-Compression Cycles (Cascade, Multistage and Absorption)*

8. Gas Cycles

8.1. *Introduction: Air-Standard Cycles*

8.2. *Air-Standard Otto Cycle*

8.3. *Air-Standard Diesel Cycle*

8.4. *Air-Standard Brayton Cycle*

9. Thermodynamic Relations

9.1. *Functions of Two Independent Variables*

9.2. *Maxwell Relations*

9.3. *Thermodynamic Relations for Phase Change*

9.4. *Thermodynamic Relations in Single-Phase Regions*

9.5. *Other Thermodynamic Properties and Relations*

9.6. *Developing Thermodynamic Tables*

9.7. *Behavior of Real Gases - Equations of State*

10. Thermodynamics of Ideal Gas Mixtures

10.1. Mixtures of Ideal Gases

10.1.1. Properties of Mixtures

10.1.2. Energy Balance for Mixtures

10.2. Psychrometrics

10.2.1. Thermodynamics of Air-Vapor Mixtures

10.2.2. Applications

11. Reacting Mixtures and Combustion

11.1. Combustion

11.2. Enthalpy of Formation

11.3. Energy Balances for Reacting Systems

11.4. Enthalpy of Combustion

11.5. Adiabatic Flame Temperature

11.6. The Third Law of Thermodynamics and Absolute Entropy

11.7. Entropy Balance for Reacting Systems

11.8. Chemical Availability
